Method

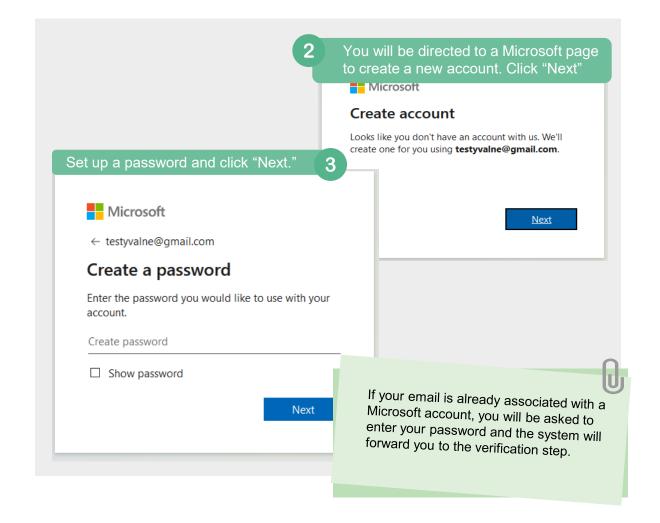

#### **Create Account**

Once the registration is complete, you will receive an e-mail invitation with the following details:

Sender: <u>invites@microsoft.com</u> (Microsoft Invitations on behalf of INNIO)

Subject: INNIO invited you to access applications within their organization

# **INNIO** Account Setup Troubleshoot

#### **Incorrect Password**

#### **IF YOUR COMPANY IS USING OFFICE 365:**

Please be advised that if you are receiving an error similar to the one below you are required to reset your company's password.

In order to reset your corporate password, you can click "reset it now" or "Forgot my password option" if your Organization allows it.

If the password reset option is blocked by your Organization or you are having problems with the setup, please contact your IT department/ Help Desk to have your password reset for you.

With the changes to the new platform, we are not entitled to reset your password manually anymore since this is your company's account, not an INNIO login as before.

If you are seeing the incorrect password message and after clicking on **reset password**, you receive the following message below:

#### Microsoft

Get back into your account

We're sorry

You can't reset your own password because password reset isn't properly set up for your organization.

You must contact your administrator to both reset your password and to check your organization's setup.

Show additional details

Please contact your IT department/ Help Desk to have your password reset for you.

Authenticatio

#### **Verify Access**

Microsoft will verify your e-mail by sending you a code.

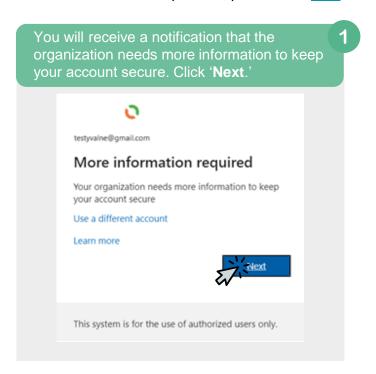

# **How to Register a New User**

#### **Set up Authentication Method**

To increase security, INNIO has enabled an IT Policy that requires all accounts to use one of the Multi-Factor Authentication methods to access INNIO systems. If you need more information on this process, please click <a href="here">here</a>.

Verify Access

Set up Authentication Method

#### **Microsoft Authenticator Pros:**

- · No need to spam your memory with another 6-digit code.
- Once set up, requests can be approved even without mobile data or wi-fi access if you use a one-time passcode.

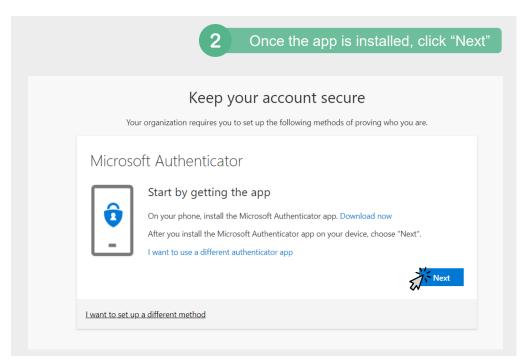

# Microsoft Authenticator Application

How to Set up

# **How to Set up the Microsoft Authenticator Application**

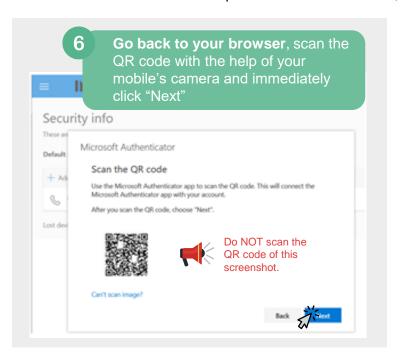

#### **Set up the Microsoft Authenticator Application**

1. Go to your phone's App store and download Microsoft Authenticator application;

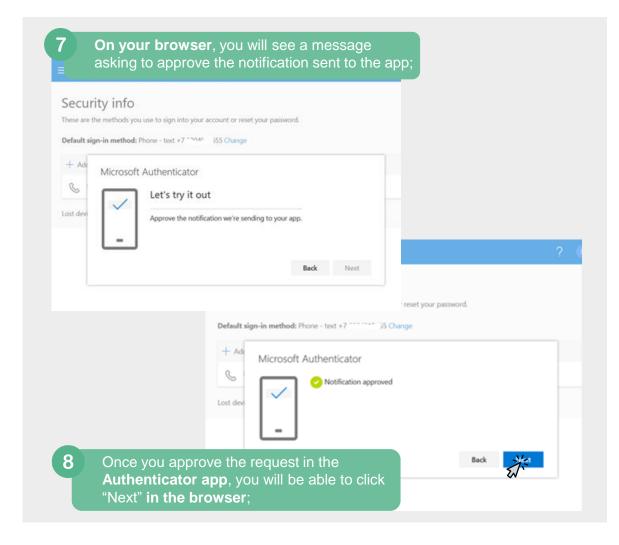

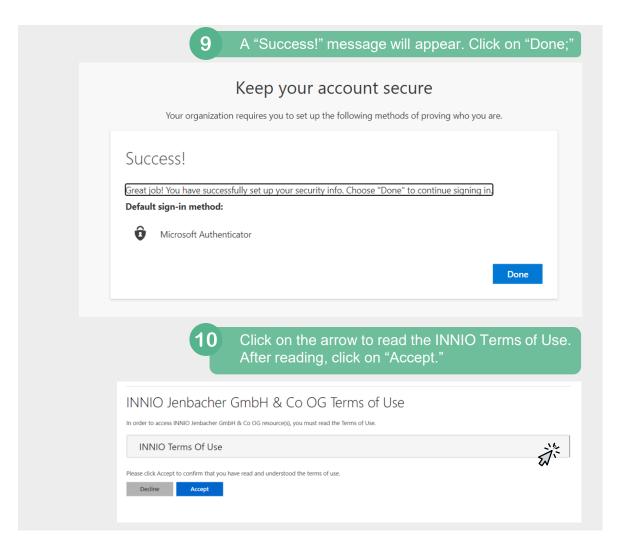

- 3. On your phone, search for Authenticator App and open it.

  Please note: At this point, you might be asked to input your phone pin and allow push notifications and camera settings.
- 4. In the **Authenticator app**, choose "Add account;" **Android:** You can find this option on the 3 dots in the top right corner **iOS:** You can find this option on the + sign in the top right corner
- 5. Select "Work or School account" and the option to scan the QR code;.
